

**Increase Throughput by 30%**

## **SERIES 1570 GRIPPER ELEVATOR**

**Description of Operation:** This machine receives parts from the conveyor at random spacing and captures them on a continuous moving set of gripper chains. They are then lowered (or raised, depending on the configuration) to a discharge point where they are transferred onto a take-away conveyor.

- Special Features:**
- Modular construction
  - Ball bushing double slide adjustment with single hand wheel for ease of adjustment and accurate pressure on product.
  - Vulcanized grippers with integral anchors for extra long life
  - Smooth quiet operation
  - Torque overload protection
