FREQUENTLY ASKED QUESTIONS:

Q: Using the pitch counter is complicated. It's hard enough to keep track of balls and strikes. What is the easiest way to manage both the batter's count and the pitch count?

A: There are many different ways to record the game information. The following method works best for me. Feel free to send feedback, improvements, and/or suggestions to handling pitch counts on the scoreboard.

1. Place the screen on Pitch Count ready mode by pressing the left (HOME) or right (GUEST) Pitch Count button. (the "+" tells you which pitch count side you are controlling)

00 +Pitches 00

or

00 Pitches+ 00

2. As soon as the pitcher makes the pitch, press "1".
3. Enter the result: a) ball: press "BALL" twice (once for ready mode; second to enter result);
b) strike: press "STRIKE" twice;
c) foul ball on strike two: go back to Step 1 (as the + is gone when you pressed "1");
d) ball in play, walk, or strikeout: press "RESET" to clear the count; record any outs and/or runs when finished, go to Step 1 - Pitch Count ready mode for the next pitch

Q: Can the pitch count be added to automatically when we enter balls and strikes?

A: At this time, no. We are still testing this scoreboard function. For some reason, this function only works on one pitch counter. We have contacted the manufacturer for assistance. We will update this guide when it is ready.
