Bags

Innovative & Custom Palletizing

More than just an ergonomic benefit, a PASCO palletizer produces better, tighter loads for shipping. PASCO bag palletizing ranges from semi-automatic to a complete system that will weigh, fill, condition, palletize and wrap with a tightly integrated, turn-key system from a single source.

End of Arm Tooling

PASCO built, can also pick pallets & slipsheets.

Bag Conditioning

Delivers best possible bag to palletizing cell.

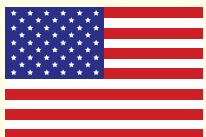

Valve Bag Placing

For turnkey operations. Fully integrated with bagging systems.
