**Goal as a Director:** To continue to grow our game of hockey through innovative and creative strategies that utilizes social media and show prospective parents that our game is affordable and fun. Support and grow local associations as well as support arena owners so they buy into our drive to grow the game.

## **Experience**

**Coaching: Level 4 -** I have been a head coach for over 14 years, most recently as Head Coach of the Compuware 2002 Tier II team. We have used many of the principles of the ADM model and have found both success and fun in utilizing these principles. Coaches are the life blood of hockey and need our support.

**Referee:** I have refereed for over 15 years (currently retired), but have used this experience to see exactly the areas of support and improvement our officials need. I would look to help District RIC to get funds to help mentor and grow our young officials. Those resources are lacking and as a result officiating can suffer without more support.

**Administrative:** served on LCAHL Operations Board for the past 8 years as House Director. I introduced the concept of split seasons for house hockey to create a more competitive season for all our players. I have twice served as a MHA Director in both District 2 and District 4.

I am committed to being a positive force on our game and to help District 4 get the resources available.
