NATIONAL SEX OFFENDER PUBLIC WEBSITE MOBILE APP

THE U.S. DEPARTMENT OF JUSTICE

The NSOPW mobile application provides users with information about registered sex offenders that have residential, employment, or school addresses that are within a close proximity of the mobile device running the app. Searches can be conducted nationally using a ¼ mile, ½ mile, or 1-mile radius or by offender name. The initial search will be performed based upon the location of the mobile device, but searches can be run from other locations by tapping those locations on the map. In the event that the registering jurisdiction (state, territory, Indian tribe, or District of Columbia) for the user's area does not allow searching by geographic coordinates for registered sex offender addresses, a zip code search will be used to find matching offenders. NSOPW is actively working with all jurisdictions to allow searching by geographic coordinates and will modify the app searching capabilities as improvements become available.

Apple Phone

Android Phone

The map below shows the states that allow NSOPW to search by geographic location (states shaded in blue) and those that do not (states not shaded). A user performing a search from a blue state will receive mapped results of offenders that have a registered address within the selected radius of the device location. Users performing a search from a white state will receive a list of offenders that have a registered address within the same zip code of the device location.
