

## 2019-2020 Season SafeSport requirements.

This is meant to clarify information about expiration dates and Safesport updates and compliance.

Please Read Carefully:

This Information is the exact USAV explanation to help clarify the requirement. Thank you for reading and taking the required action.

During the 2018/2019 season, the U.S. Center for SafeSport changed the SafeSport training to an annual requirement. In doing so, the Center launched a Refresher 1 course as part of the annual training. USAV is incorporating that refresher into the training for the 2019/2020 season and beyond. In transition, those having a 2019 expiration date are required to take the Refresher 1 (10-15-minute course). The newest version of the course will be available September 1, 2019 to coordinate with the opening of registration.

Those of you with a 2020 expiration date are not required to take the refresher ***until your Core date expires***. In short, the annual “Refresher” training becomes required upon the expiration of your current Core SafeSport training. I hope this clarifies the Refresher requirement.
