*The original "INTERSCHOLASTIC" Track Meet was organized by Dr. JP Rowe in 1904. Dr. Rowe was a Geology Professor at Montana State University (now the University of Montana) in Missoula.

**To make it easier for the average person to read these lists, we have used the Fully Automatic Timing conversion sequence for all the running events that were hand timed. If the time shown in hundredths at the front of the line is followed by an asterisk, then the time was registered with manual timing. If the time doesn't have an asterisk, then the time was registered by a Fully Automatic Timing Device. National rules dictate that all hand times must first be rounded up to the next tenth of a second and then increased by 0.24 seconds. An example would be a hand time of 10.51 seconds changing to 10.6 and then adding 0.24 seconds to make the official converted FAT time 10.84 seconds.

***All of these performances were accomplished by Montana athletes who were in good standings with their high schools at the time of their performance.

The following is a list of the top ten performances by an individual/relay team at a Montana meet.

Each Athlete is entered only once.

Indoor, wind-aided, out of state, non MHSAA meets, and performances completed in races ran in yards (not Meters) are also recorded in a separate section below the top ten list, at which time an athlete may be entered again.

: "ALL STATE" RECORDS

The MHSA has a policy of recognizing the official time for the purpose of State Records and does not use the Fully Automatic Timing conversion formula. Therefore, there can be two state records at the same time if the Hand Time is numerically faster than the FAT Time. Times in parenthesis are actual hand held times. Those times in hundredths are either FAT times or converted FAT times.
