To Whom It May Concern,

CIHRA will be suspending the assignment of officials for all organized youth and adult games effective immediately for each ice hockey facility and association for which we schedule officials. The health and safety of our officials and all ice hockey players in Colorado is our number one concern, and CIHRA will adhere to those requirements set forth by the State, as well as any local city and county specific requirements.

If any facility is allowed to host ice hockey games under the current health orders, and would like to request officials, please send the request to your scheduler with a written description of the health order being followed and assurance officials will be working under the stated guidelines.

We are encouraging all ice rinks and associations to keep an open and direct line of communication with the CIHRA board for any questions that may arise in the coming weeks, and to be prepared to begin planning and scheduling games again once State, County and local government requirements allow for facilities and recreational sports to start up again.

Thank you,

Bob Keltie

President CIHRA
