

Bismarck Youth Baseball Concussion Policy

Definition:

According to the CDC, "a concussion is a type of traumatic brain injury caused by a bump, blow, or jolt to the head or by a hit to the body that causes the head and brain to move rapidly back and forth. This sudden movement can cause the brain to bounce around or twist in the skull, creating chemical changes in the brain and sometimes stretching and damaging brain cells."

Purpose:

Bismarck Youth Baseball will implement the following policy and procedures with the purpose of lowering serious health risks associated with activity related concussions or head injuries. Youth are more at risk for concussions, and they can be damaging to the development of the brain.

Policy:

It is a mandatory policy of the Bismarck Youth Baseball that coaches, umpires, site supervisors, parents, and participants will be educated on the signs, symptoms, and behaviors that are consistent with concussions. They WILL NOT be trained to diagnose a concussion, that is the responsibility of a qualified healthcare provider. We ask for best judgment when observing the signs, symptoms, and behaviors of concussions and head injuries.

Participants under the age of 18, who are suspected of a concussion or head injury, must sit out and seek medical attention. Participants will not be able to return to activities until proper procedures have been followed. The Bismarck Youth Baseball Return to Play form must be signed by the parents/guardians.

Signs and symptoms of a concussion or head injury:

- Headache
- Confusion
- Double or blurry vision
- Dizziness
- Nausea or vomiting
- Ringing ears
- Memory loss
- Sensitivity to light or noise
- Difficulty concentrating
- Slurred speech
- Mood or personality change

If participants are exhibiting any of these symptoms after a head injury, they must be pulled from the activity immediately and a parent or guardian must be notified.

Policy:

1. Distribution of Policy

- A. Parents, coaches, assistant coaches, and site supervisors associated with the sport or activity should become familiar with and have access to a copy of the Bismarck Youth Baseball Concussion Policy and access to the Center for Disease Control (CDC) information on concussions. These can be found on the Bismarck Youth Baseball Website.

2. Concussion Procedures

- A. Any participant exhibiting the signs, symptoms, or behaviors associated with a concussion or head injury must be immediately removed from the activity and may not participate again in any activity until the Bismarck Youth Baseball Return to Play form is signed by the parents/guardians.
- B. The participant's parent or guardian should be immediately notified of a possible head injury.
- C. Coaches or site supervisors must fill out an initial incident/accident report.

NOTE: This policy is applicable only to Bismarck Parks and Recreation District programs, leagues, and events. Bismarck Youth Baseball is not responsible for implementing any concussion or head injury policies or procedures for independent teams, leagues, events, or organizations.
