Official Stadium Sound Supplier

High quality audio, energizing music and clear speech are important elements to engage the crowd in your stadium and deliver a great fan experience. Electro-Voice speakers and Dynacord electronics are engineered to deliver optimal performance, reliability and value in one complete audio solution. This makes us the preferred choice in sport venues around the world - from single-bleacher to over 100,000 seat stadiums. Building on this expertise, our audio design team is able to assist you in finding the solution that fits your stadium layout - making sure every single seat has an optimal game-day experience.

James Ure | james.ure@us.bosch.com | 303.845.0629

Official Stadium Surveillance System Supplier

With thousands of people congregating at their venues, sports stadiums must meet demanding security and safety criteria that cover challenges ranging from protecting athletes, staff, and visitors to preventing and responding to vandalism, theft, disorderly behavior, and other security risks. Bosch offers integrated solutions that increase facility security and automate functions for easy operation, protect high-risk areas, and provide stadium-wide control of video and security devices. Bosch solutions can be customized to meet the unique needs and challenges of each stadium and feature intrusion detection, access control, and video surveillance and monitoring. Bosch intelligent security cameras deliver the highest quality of images and feature built-in video analytics that alert staff to potential threats and gather data that can be analyzed for reasons that go far beyond security, making it possible to reduce costs, increase efficiency, and enhance customer engagement. Bosch security solutions are trusted by arenas, stadiums, and other major event venues throughout the world.

Lewis Stallworth | Lewis.Stallworth@us.bosch.com | 470.557.6820

Official Retractable Mound Supplier

As venues and stadium management look to expand their stadium utilization – without building new stadiums – creating a multi-purpose venue is critical to scheduling soccer, concerts, lacrosse, rugby, and other activities. Field conversion is a scheduling challenge when a pitcher’s mound is involved. To manually remove a pitching mound and rebuild it after a non-baseball event takes expensive materials and labor. Esto Retractable offers a patented design for a Retractable Pitching Mound to allow field conversion in two hours – allowing you to play baseball in the morning and play soccer that same evening. Transforming stadiums in hours – not days – is the key.

Esto Retractable offers licensing agreements for each installation, providing design documents, outline specifications, and consultation to expedite the engineering of your retractable mound.

Clients/Experience

The prototype retractable mound was installed at Louisville Slugger Field in 2015 and has provided 100% reliability, ease of operations and low maintenance performance.

The 3D illustration below shows the components of the retractable mound. A video of the components as well as the conversion can be viewed at www.estoretractable.com

Official Wireless Solutions Provider

Connectivity Wireless delivers next-generation wireless infrastructure and smart system analytics to enable world-class connected guest experiences and network monetization for sporting venues. We deliver turnkey solutions, including consultation, design, installation, monitoring, maintenance, and ongoing management.

In addition, every venue is assigned a dedicated project manager, deployment manager, and, if needed, a construction manager. A team of RF experts and network engineers will be allocated to your project from the moment we engage with you. We handle it all so you can focus on your next big game, event, or concert.

Connectivity Wireless is a leading wireless solution provider delivering purpose-built, world-class Wi-Fi, cellular, and private LTE/CBRS networks. We offer an extensive array of support and financing options along with our industry-leading network analytics platform, ConnectLytix, to ensure the best possible fan experience, optimal network performance, and network monetization.

Connectivity draws on lifetimes of experience and the lessons learned in the deployment and management of 2700+ wireless networks in every vertical market, including MLB, NFL, NHL, and a wide variety of other sporting venues, to build customized plans to help our customers solve problems. We believe in spending where it counts and delivering high-quality, high-performing networks in the most efficient way possible to ensure the vision of connectivity is delivered with maximum economic value.

Clients/Experience

Connectivity Wireless provides technology solutions across every vertical market and industry, and has a long legacy of providing cutting-edge infrastructure for sporting venues throughout the US.

Preferred Player Development Management Software

FootballISM is an integrated software management tool for soccer clubs. The project was launched in 2011 in partnership with one of the best youth academies in the world, Sporting Clube de Portugal, known for releasing players such as Cristiano Ronaldo and Nani. The objective of the system is to help soccer clubs professionalize their processes, centralizing their information in one single platform, while becoming fully digital.

Technical area, scouting, medical, nutrition, performance, legal, facilities management, stock management, and logistics are some of the departments that would see their work facilitated by working in a single environment, always respecting user permissions and software security.

FootballISM has been working with Sporting CP since 2011, and had its first growth spurt in 2018-2019 reaching 10 clients. From professional clubs in Portugal, to academies in Brazil, they are now working with one of the best clubs in the world: Sevilla FC, winner of 5 Europa Leagues in the 21st Century.

Their system has proven its success, and the U.S. market is their next step.

Preferred Technical Team Performance Monitoring Partner

PlayerMaker is a sports technology company revolutionizing the way football teams use data. Utilizing cutting-edge motion sensors and advanced machine learning algorithms, the device tracks all technical, tactical, biomechanical and physical movement on and off the ball, giving managers and coaches a granular understanding of their players' and team's performance. Used by elite level clubs worldwide, the PlayerMaker device delivers a competitive advantage to some of the most forward-thinking coaches.

PlayerMaker is the most holistic player performance approach, providing solutions for every team's department. It fast tracks player development and acts as a coaching enhancement tool. It also provides automated video tagging of every individual player's ball possession within five minutes. Furthermore, it tackles the future of injury prevention and gait analysis.

Already in use internationally, PlayerMaker tracks and analyzes tactical, technical, and physical player performance on and off the pitch. The breadth of data generated can inform coaches' decision-making processes, particularly in relation to player performance optimization, talent identification, and injury prevention.

Jim Massoni | jim@ruffneckwear.com | 360.320.7374

Official Ball Supplier

Founded in 1947 by Danish national team player Eigin Nielsen, SELECT has been an innovator on the pitch since its early days. SELECT match balls were the first to be produced with no outside cord, which allowed the ball to better retain its shape, and later was the first manufacturer to introduce the 32-panel design, which is now the standard for soccer balls around the world. SELECT's hand-stitched footballs and handballs retain their perfect balance, touch, bounce and flight for thousands of hours, even with severe pitch and weather conditions.

For about 70 years, SELECT has only used the best leather and (later on) the best synthetic materials for their hand-stitched balls. They also offer the most comprehensive quality warranties in the industry. To ensure that all SELECT balls live up to their quality requirements, they are thoroughly inspected at their production site in Pakistan, followed by another inspection in Denmark on their top balls. They inspect the stitching, surface, sphericity, circumference, weight, airtightness, and printing inks before they deliver their products. They even pump up the bladders they produce to ensure the perfect balance. SELECT's quality standards are the highest in the industry, even higher than those of FIFA when it comes to the best match balls. They guarantee the quality of their balls and offer the best warranties in the industry: a three year warranty for stitching and shape for their Pro Series balls and a two year warranty for their Club Series balls.

Official Premiums Supplier

The Promotions Dept. is a leading promotional merchandise agency. For the past 25 years, they have been developing, producing and fulfilling promotional products and programs for sales & marketing departments. They provide in-arena/game day premiums and gift items to over 50 professional sports teams from leagues including MLB, NFL, NBA, NHL, and MLS.

As a leading supplier of premiums and promotional items including apparel, replica jerseys, bobbleheads, etc., The Promotions Dept. allows clubs to develop high-quality, team-branded promotional products to elevate their brands, create stadium atmosphere, and recognize and reward fans. Clubs are constantly looking for ways to enhance the fan experience, and incorporating promotional items plays a major role in those efforts.

Official Sponsorship Management Platform

Trak provides collaboration and visibility throughout the life of your corporate partnerships, so you always have access to the information you need, exactly when you need it.

It helps accelerate and simplify sponsorship management; so sponsorships are pitched with the correct inventory, executed with the correct artwork, involve the correct people, and every inventory item is maximized to grow partnership revenue.

By having one central location, we give everyone time back to strategically build, plan and THEN activate their partnerships instead of getting bogged down with complex partnerships (which is what all sponsors want) because their disjointed rows and columns (excel anyone?) and inefficient processes (more meetings phone calls and emails) can't handle the volume of exchanges required to pull them off.

Clients/Experience

- | | |
|----------------------|-----------------------------------|
| United Soccer League | Baltimore Ravens |
| North Carolina FC | San Francisco Giants |
| DC United | Detroit Red Wings |
| Sporting KC | Monumental Sports & Entertainment |

"Trak has allowed us to completely streamline our partnership fulfillment plans. We not only use it to organize assets and deliverables before the season, but also for proof of performance throughout the year. It has made us more efficient and proactive with our partners which they very much appreciate."

Katy Campbell
Director - Marketing and Partnership Activation (North Carolina FC)

veo

Official Video Provider (Super Y League)

Founded in 1947 by Danish national team player Eigin Nielsen, SELECT has Our mission has always been to make the football recording and AI analysis available to all clubs, no matter the size, financial ability or skill level. Small market clubs have not previously been able to firstly, record their matches, furthermore, have access to in-depth analysis. While the background technology can be complicated, we maintain our goal to make the process of recording, uploading, viewing and sharing your game as simple as possible. We are democratizing football, one camera, one field, one team at a time. We're very excited about the future that this innovative software and technology will bring to football and the other sports we expand to. We continue to push the boundaries towards the future of sports recording and analysis. Veho currently works with 2500 clubs across the world and operates in over 60 countries.
