

PSWRD for IPAD is 123456 in case you are locked out. Password for Game Sheet for our D6 is ipad-mnd6rs

BEFORE THE GAME: Scoresheet will show you where you have errors, you can click on and fix error.

Game Details: Have to put in start time of game

Visitor Roster: One coach must sign, if there are others listed. I either remove or scribble their names. They can sign at end of game but much easier to get ahead of time. Put in starting goalie or you'll get error (sometimes it defaults to goalie).

Home Roster: One coach must sign, if there are others listed. I either remove or scribble their names. They can sign at end of game but much easier to get ahead of time. Put in starting goalie or you'll get error (sometimes it defaults to goalie).

Referees: Have Refs sign at end of game. They will look over everything and I always double check with them if there has been a Misconduct to review that.

DURING GAME: Scoring: This is the most important section and where you will spend all your time at during the game. Most focused on goals and penalties. *I keep a scratch piece of paper in case you have a lot happen you can write down and then add.*

- Goals-Hit add Goal under team that scored, put in time in drop down menu, then player list will load and you can assign assists if necessary.
- Penalties-Hit add Penalty under team with penalty, put in time in drop down menu, then player list will load. Duration-Normally 2 Mins(depends on level), Code list will drop down. **Do not use GM unless it is really a Game Misconduct.** If you do not see penalty from frequently used. Search for it by typing infraction in.
- Shots on Goal-Not necessary but you can keep track. Just keep adding (I normally true up at end of period with scoreboard if you are doing that).

MAKE SURE TO SWITCH TO NEXT PERIOD IN BETWEEN PERIODS, IT IS ON THE TOP.

Tip: If you mess up (entered in wrong goal or penalty), you can swipe left and it will say delete-press delete.

GIVE IPAD BACK TO TEAM MANAGER DO NOT WORRY IF YOU DON'T HAVE SOMETHING, WE CHECK IT OVER BEFORE SUBMITTING SO IT IS NOT LIVE!
