

Reschedule Guidelines:

If a team is in the need of a reschedule within the 14 day window it **MUST** be by mutual consent of both teams.

- Once both teams agree to the reschedule it **MUST** be approved by the league before it's official and assignors are notified.
 - Even though teams have agreed to the reschedule that doesn't guarantee league approval
 - In certain cases teams may agree to a reschedule but since it's within the 14 day window referee fees may still be owed by the team requesting the reschedule.
 - If this fee is not paid the game will be posted as a forfeit.
 - Multiple forfeits may result in ability to win the league or removal from the league

Emailing a league representative is not an acceptable way to change a game. A Game Change form must be completed. The game change form can be found at <https://www.edpsoccer.com/page/show/4376518-edp-league-support>

- *The league will send both teams a message of the approved change. If you do not receive a response by Tuesday of the week, please reach out to the league to confirm that the game change request went through properly, and what is going on with it. Please allow 48 hours to respond to all Game Change Form Requests
- Coaching conflicts are not an acceptable reason to cancel a game. Teams will need to find another carded coach in the club to cover the game. These conflicts should have been taken care of prior to the season.
- Player availability is not an acceptable reason to cancel a game. As a US Youth Soccer sanctioned league teams can supplement their roster with players from other teams within their club. The league does not want to go against its mission of a good game every week, but can't have games being changed last minute due to conflicts from other sports, vacations, or other reasons.
- Conflicts with games from other leagues are not an acceptable reason to cancel a game.
- USYS State Cup dates are available in advance, and teams should work with EDP opponents ahead of time to avoid conflicts. We understand that teams do not know if they will play again until they win the previous round, but teams must be proactive in working with opponents to let them know that there may be a state cup game, and come up with an alternate date. This needs to be done immediately following the previous game so that the home team has time to make appropriate changes. When possible, these games need to be worked

around the EDP schedule. It will not be acceptable to not play a league game due to State Cup if both games are not scheduled on the same day.

- No game will be moved from the original date until a new date is agreed upon. The league will not allow teams to agree to postpone a game for later in the season without a new date confirmed.
- If a team cancels the week of the game, they will be responsible for the total referee fees and facility fees for that match and may be subject to a forfeit.
