

# Minnesota Hockey Return To Play Guidelines

---

## Phase 2 Update -- Beginning June 24, 2020

As we navigate through the COVID-19 pandemic while returning players to the ice, Minnesota Hockey will continue to provide updates to our associations and members. These considerations focus on several phases of returning our members to the rinks throughout the state of Minnesota.

*Each association should have its own plan in place for returning to the rink. Local rinks and associations need to follow the guidelines set forth by the Center for Disease Control and Prevention (CDC), the Minnesota Department of Health (MDH) and its [Guidance for Social Distancing](#), as well as local government officials in determining when, and how, it is appropriate to return to the rinks, including requirements or guidelines for physical distancing, size of gatherings or number of people permitted in a facility, or wearing masks, etc.*

*The information in this document is not intended or implied to be a substitute for professional medical advice, diagnosis or treatment. The knowledge and circumstances around COVID-19 are changing constantly and, as such, Minnesota Hockey makes no representation and assumes no responsibility for the accuracy or completeness of this information.*

*As you plan for a return to the ice, below are some ideas to consider to assist with developing a return to hockey programming in context of COVID-19. Please know these are not requirements, but are recommendations and ideas to consider when evaluating your programming. As conditions and requirements may vary throughout the state, our best advice is to follow state and local government guidelines and [recommendations from the CDC](#). Until COVID-19 is either eradicated, a vaccine is developed, or a cure is found, there is no way of completely eliminating the risk of infection.*

*We are thankful to all of those essential workers and first responders who are guiding us and keeping us safe and healthy during this pandemic. Remember that we can contribute to helping eliminate COVID-19 by doing these four things:*

- 1. Physical Distance*
- 2. Wash Hands and Practice Safe Hygiene Habits*
- 3. Clean Surfaces & Equipment between uses*
- 4. Staying Home When Sick Or Experiencing Any Symptoms*

*Minnesota Hockey will open programming in phases, which are subject to change at all times. They are also subject to restrictions placed by state or local governments.*

***\* Minnesota Hockey began sanctioning on-ice activities on June 1. However, activities are subject to restrictions or advisement from the MDH.***

***\*\*Starting July 1, players aged 6 and Under or “Learn to Play” skaters are allowed to return to the ice.***

***\*\*\*The latest updates to this document from its original form are shown in red font.***

## Phase 2 – Practices, Clinics, Tryouts

Phase 2 opens on June 24, per Minnesota's [Stay Safe Phase III Plan](#) and [MDH guidelines](#).

### Arriving at the Rink

1. Players or coaches with any risk factors or illnesses should not participate in any on-ice activity. Any players, coaches or spectators exhibiting symptoms or signs of an illness should not be in the facility at any point.
2. Participants should utilize the [Minnesota Symptom Screener Guide](#) prior to any on-ice activity. These screens should be monitored by each association.
3. All participants must be USA Hockey registered for the 2020-21 season to participate in any Minnesota Hockey sanctioned on-ice activity.
4. Players should arrive at the rink no more than 15 minutes before the start of on-ice activities. Anyone arriving earlier than 15 minutes before their start time should wait outside of the facility and be socially distanced from others.
5. If there is an activity occurring at the rink before the team's scheduled start, the incoming team should wait until all players from the prior event have vacated the building. There should not be interaction between the two groups.
6. **For practices or clinics**, players aged 11 and older should be dropped off at the rink, and picked up afterward. Their parents/guardians should not be in the arena. Players aged 10 and under are allowed one parent/guardian in the rink to help with any equipment needs. Those parents/guardians may also be at the rink, socially distanced from others, to provide assistance to the player if needed throughout practice time. Masks are advised, and may be required by the facility for parents/guardians.
7. Families should provide coach/team manager with accurate contact information in the event of emergency while the player is at the arena. This information **MUST** be accurate and the responsible party **MUST** be able to reach the designated person if the need arises.
8. Whenever possible, players should use the restroom at home prior to leaving for the rink in an effort to limit bathroom use at the facility.
9. Players **and officials** should arrive to the arena fully dressed with the exception of skates (coming in to the arena with skate guards on is ideal) and helmets. Exceptions may be made for goalies, who may need to put on additional equipment at the rink.
10. Players should be bringing their own rehydration liquids to the rink in clearly marked or labeled containers with the player's identity. The container should be re-sealable. Players should **NOT** plan on refilling their containers at the rink.
11. Prior to the first on-ice session, coaches and/or association leaders should host an e-meeting to explain procedures to parents, and to answer any questions.
12. Coaches should be as prepared as possible to ensure complete utilization of the allowed ice time. This also helps ensure that players are not distracted and know they need to be on time and ready to go, not engaged in other areas of the building.

13. Each association and team should have an emergency plan for any positive cases within the team or association. **If a case of COVID-19 is reported to you and is a part of your organization or team, report the case to the Minnesota Department of Health at [health.sports.covid19@state.mn.us](mailto:health.sports.covid19@state.mn.us) and local health officials. MDH or local public health will work with you to identify close contacts and do follow-up with your team.**
14. Each association and team should maintain accurate rosters of teams or pods and be prepared to support local public health contact tracing efforts.
15. Associations should work with rink partners, and be aware that some communities may not open rinks despite the Stay at Home order being lifted.
16. **Dryland activities inside the arena are not advised during Phase 2.**
17. Safesport policies will continue to be in effect in all phases. There should always be a minimum of two adults at every on-ice event, and there should be no unsupervised one-on-one interaction between a player and a coach.

### **Phase 2 On-Ice Activities for Practices, Clinics and Tryouts:**

1. **Within the program, create consistent pods of the same staff, volunteers and participants with a maximum number of 25 people in each pod. Ice rinks will be allowed to have two (2) pods of 25 people or less at a time with no mixing between the groups.**
2. Players need to maintain as much separation as possible **during practices**. Whenever possible, coaches should be promoting social distancing on the ice, while recognizing that there may be times of close contact by players.
3. Avoid using player benches **during practices**.
4. Coaches should be keeping players active and engaged at all times. Players should not leave the ice during a practice unless absolutely necessary.
5. **Each coach and on-ice helper counts toward the number of people allowed on the ice as stipulated by the MDH.**
6. **Reduce contact between players as much as possible.**
7. Coaches should avoid talking face-to-face with players, as well as avoid contact with players whenever possible. Physical contact may be necessary when assisting a young player or a player with a disability (helping up or adjusting equipment), but whenever possible, coaches should provide assistance without physical contact, or ask the player's parent/guardian to assist.
8. Prior to the completion of the ice time, players should be excused from the rink one by one and through different exit points of the rink. Do not ask players to participate in picking up pucks or other equipment from the ice.
9. **There should be no spitting by any player or coach at any time inside the arena, including on the ice surface.**

### **After On-Ice Activities are Completed:**

1. No on or off ice interaction (socializing, team meetings, dryland activities) should occur following the conclusion of practice. Players should remove skates and helmets and leave the premises within 15 minutes of the end of practice.
2. Players should vacate the arena immediately to allow for the next user group to enter.

3. Parents/Guardians must be made aware of the time when the players will be done. The parents or person assigned to pick up players at the arena must be punctual. Players should not have to wait for a ride.
4. Coaches or other responsible adults should remain until all players are safe and removed from the premises.
5. While at home, players should clean and disinfect gear after each use.

## Phase 2 – Local Games and Scrimmages

1. Starting June 24, begin with inter-team scrimmages as part of practice.
2. Two weeks later, focus on playing teams in your local community, local club or local organization.
3. After another two weeks, consider expanding to teams beyond your local community, but consider COVID-19 case activity level and risk in those communities when making travel decisions. The MDH strongly discourages travel to play games outside of Minnesota.
4. Spectators are allowed for games per arena recommendations. Spectators should be physically distanced at all times. Cloth face coverings are encouraged even if not required by the facility.
5. At the scorer's/announcer's box, best practice would be that one assigned adult will be responsible for clock and scorebook with nobody else allowed in the area. **In instances where there is more than one off ice official, masks should be worn.**
6. Whenever possible, resurfacing of the ice sheet should only take place before or after a game.
7. There should be no more than two coaches allowed in the bench area during games. Coaches on benches should be wearing masks. **One coach should monitor players on the bench and keeping them physically distanced.**
8. **Coaches should figure out a system that maximizes physical distance between players on the bench during game play, stoppages, intermissions, etc. Space outside the bench area (next to bench) should be utilized whenever possible.**
9. During a stoppage of play caused by a save, the goalie should drop the puck on the ice for the official to retrieve.
10. There should be no pregame or postgame handshakes. Teams should honor each other after the game with a stick salute.
11. **There should be no pregame or postgame huddles or post goal gatherings on the ice.**
12. A two official system shall be used for games at all levels.

## Phase 3

**Phase 3 is the implementation of the Minnesota Hockey regular season as has been conducted in the past. However, all associations and members should be aware that changes or adjustments may be made based on the status of COVID-19 in Minnesota.**

## Phase Overview

Activity	Phase 1	Phase 2	Phase 3
<b>Tentative Timeline</b>	June 1	June 24	Announcement by September 1 ( <b>subject to change &amp; MDH guidance</b> )
<b>Practice</b>	Open per MDH guidance	Open per MDH Guidance	Open
<b>Skill Clinics</b>	Open per MDH guidance	Open per MDH Guidance	Open
<b>Tryouts</b>	Open but not recommended initially per MDH guidance on no contact	Open per MDH Guidance	Open
<b>Dryland</b>	Closed inside arena	Recommend outdoors	Open
<b>Inter-Team Scrimmages</b>	Closed	Open after June 24	Open
<b>Local Games</b>	Closed	Open after July 8	Open
<b>Travel Games</b>	Closed	Open after July 22	Open per MDH guidance
<b>Tournaments</b>	Closed	Open after July 22	Open per MDH guidance

## Additional Resources

As stated previously, this document is not intended or implied to be a substitute for professional medical advice, diagnosis or treatment. Associations must adhere to guidelines set by the CDC and MDH. The knowledge and circumstances around COVID-19 are changing constantly and, as such, Minnesota Hockey encourages all programs engaging in activities to stay up-to-date on future developments.
