8th April 2020

### Covid-19 - Summer Season Schedule Impact & Scenarios

This is an unprecedented time with many uncertainties still in front of us. While following direction from Ontario Soccer as well as Government and Health Official advice to remain indoors and practice social distancing, the Club remains diligent in planning for various possible outcomes for an upcoming summer season.

### What we know as of - April 7, 2020

Ontario Soccer has halted all soccer activity until at least the end of May.

### For Our Timbits Soccer & Recreational Programs

We are focusing our planning around 3 possible scenarios

1. Delayed start to season – This would be a slight delay of 2 or 3 weeks and would see the summer season start by June 15<sup>th</sup>.
2. Late start to season – This would be a more impactful delay of 4 weeks or longer and would see the summer season start June 22<sup>nd</sup> or later.
3. Cancelled season – This would see the entire summer season cancelled.

### For our Competitive & Academy Programs

At this time, we are unable to plan for specific scenarios as currently we are awaiting instruction from the various league organizations in which our teams compete. However, information that we have received from some leagues indicates that we will not start summer competition prior to July 1st. We will communicate further as an when we have more information.

While we fully appreciate and understand that soccer, and youth sports in general, are not at the top of everyone's mind during this difficult time; it is our hope that by continuing to plan for various eventualities, our Club will limit the impact to your child's experience on the field, whenever we are able to return to the game.
