

## CBA COVID-19 Protocol

11.16.20

1. Players and coaches are required to complete a “health check-in” for every practice/game attended - NOTE: the TeamSnap app (Basic Plan for \$9.99/month per team) has this feature which would allow coaches to automate this check-in for parents to complete for every CBA practice or game
2. Players and coaches displaying any illness including: cough, fever (at or above 100.4), chills and/or muscle aches; sore throat, runny nose and/or loss of taste/smell; nausea, vomiting and/or diarrhea; shortness of breath and/or headache **should not attend any practice or game**
3. Should any player or coach be exposed to someone who has tested positive for COVID-19, they must remain home **for 14 days** from last date of contact to closely monitor for symptoms - if any symptoms are evident, the player cannot return to play until they have been tested for COVID-19
4. If a player or coach have tested positive for COVID-19, the following precautions must be taken:
  - CBA must notify [local health officials](#)
  - CBA coaches must notify the following list of individuals that have been in contact with the player/coach within 48 hours before player/coach had any symptoms (not when they were actually tested) - this includes players/coaches/families for your immediate team, any team that you may have practiced with or played against during competitive play or scrimmage
  - CBA players/coaches from team with infected player must adhere to #2 (above)
5. CBA player/coach who tested positive for COVID-19 cannot return to practice/games until ALL of the following have been met:
  - 10 days since symptoms first appeared AND
  - 24 hours with no fever without the use of fever-reducing medications AND
  - Other symptoms of COVID-19 are improving
