

## Club Team Package

Apollon enables club sports teams to have every game of every tournament filmed in ultra-high definition, slow motion 4k footage.

We equip players with the highest quality game film to be used for recruiting, branding, or personal purposes. Nearly all tournaments offer high-angle film footage and allow it to be purchased by participants to then use as they see fit. The issue with this footage is that it is consistently so low in quality that viable highlight tapes, Instagram reels, or high-resolution still images cannot be produced from it.

We ensure teams and their players can have professional -network quality- footage. In addition, we provide a robust variety of post production options on how that footage can be edited by our team of veteran Hollywood editors. We can tailor the footage for any platform the client requests. Of course, should someone want to purchase the raw footage and edit it themselves or send it off to a different editor we have an option for that as well.
