 Fencer Check in  
 Weapon Check

There is more room between each group of strips and on the ends than is shown here. There are multiple sets of bleachers at each end for spectators and movable bleachers in the finals area. Portable cushioned benches are spread around the grounded metal strips for fencers. Bag racks are located against walls around the venue and the large floor area near the vendor that may be used for bags as well. Three separate banks of monitors show all daily events. Cushioned rubber flooring throughout the venue for referee comfort. There is standing room in strip area for those that prefer to be closer to the action.

We are on the first floor and completely handicapped accessible. Closed circuit cameras have recently been installed for security.

▲ = back doors

Back doors are emergency only except the one designated for officials and the ones near the vendor so they can load/unload their equipment easily.
