

PLAYER NAME

**LUKE BELL**

CLASS

**2025**

HANDEDNESS

**LHP**

E-mail:

lukebell2025@icloud.com

Age:

17

State:

United States, California

High School:

Casa Grande High

Height:

5'10"

Weight:

155 lbs

Coach:

Blaine Clemmens

Facility Name:

Bay Area World Series

SEAM ORIENTATION

PITCH BREAKDOWNS - FASTBALL

All data points shown are averages unless otherwise specified.

Count	Velo	Max. Velo	Max. RPM	True Spin	Spin Eff%	Gyro Deg.	VB	HB	R. Height	R. Side	R. Angle	H. Angle
8	83.1	83.8	2203	1788	81.2%	-36.0	12.1	-11.0	6.3	-0.6	-2.5	1.3

PERFORMANCE TRACKING - FB

Plots will only be shown for pitches that recorded data.

STRIKE ZONE HEATMAP - FB

## RELEASE HEIGHT

Vertical height above the ground at the point the pitch is released.

## RELEASE SIDE

The distance from the center of the rubber at the point of release from the pitcher's POV where the right is a positive number and the left is a negative number.

## RELEASE ANGLE

Vertical angle of the ball leaving the pitchers hand where up is positive (higher pitches or pitches with a large amount of negative vertical movement) and a downward angle being negative (pitches lower in the zone or traditionally higher positive vertical break).

## HORIZONTAL ANGLE

The Directional degree when the ball leaves the pitchers hand where to the left is negative and the right is positive from the Pitcher's POV. Traditionally, all RH P's have a negative angle and LHP's have a positive angle to varying degrees.

## STRIKE ZONE BREAKDOWN

**Heart of Plate:** Batter wants to Swing, pitcher wants him to Take

**Shadow Zone:** 50/50 on pitch called either way

**Chase Region:** Batter wants to Take, pitcher wants the Swing

**Waste Area:** 1+ foot off edge of strike zone
