

There is a way to SYNC our website's calendar to your SMART phone!

The instructions are attached, below, which came from the website, but since they are lacking in one part that is important, I am adding to them here:

In step 2, it says to "select tags" as appropriate. This is a very important step that is not described.

FOLLOW THESE STEPS TO SYNC YOUR iPhone:

Go to the Calendar page (just tap "Calendar" from the home page and then tap "Calendar" again, no need to choose Practices/Games, as the pull down menu indicates).

From there, in the bottom right corner of the calendar (you may need to scroll down), expand the TAG menu (it is small).

This will open as an attachment to the bottom of the calendar, you may need to scroll back over the the left to see the tags.

Select "Clear ALL TAGS".

Then, select the tag for the team(s) you want to include in your personal schedule. This allows you to not have all the teams show up, but only those items for the team(s) your player(s) plays on. For combo teams with A and B teams, you can select both tags, then change it by deleting the calendar and going through this process later, once the specific team is known.

Give your phone a moment to refresh (it does this automatically once you select your tag(s)).

Then, click the "Subscribe to iCal" link at the bottom right of the calendar/tag screen.

In the middle of your phone is a pop-up window with a link that you need to copy, so you may need to zoom out, if you have zoomed in.

Once copied, go to a new browser window and paste the link into the new window.

Then hit "enter" or "go" to open that link. Another pop-up will come up on your phone, saying "Open this page in "Calendar"? And select "Open".

Then another pop-up comes up that says "Subscribe to the calendar "Mesabi East Youth Hockey Association Events"? Click "Subscribe".

It may take a moment, but then you get a pop-up message saying the calendar has been added. Click "View Events" on this message and it will bring you to your calendar.

When the calendar is updated on the website, the updates also appear on your phone. (If you have your calendar set to manually refresh, you may need to go to the calendar and "pull down" to update). But after this process is setup, everything is automatic for the rest of the season.
