

Uniform Standards

Keeping it simple:

- Uniforms like colored except for libero
- Libero uniform must contrast with teammates
- Numbers 0-99, solid numeral and contrast to uniform color regardless of outline, large enough to be legible

Examples:

Dark vs Light		Neon vs Light	
55	55	55	55
Team	Libero	Team	Libero

Non-Compliant Examples:

Dark vs Dark		Light vs Light	
55	55	55	55
Team	Libero	Team	Libero
-Uniforms don't contrast -Libero number does not contrast with uniform color		-Uniforms don't contrast -Team numbers aren't solid -Libero number doesn't contrast -Number outline cannot create contrast	

Examples of non-compliant color combinations: Navy and Black, White and Tan, Black and Red, White and Light/Sky Blue

Helpful Hint: If you were to take a picture of the libero and team jerseys side by side and then filter the picture in grayscale could you tell the difference between them

If you have questions before you order/purchase jerseys, ask in Sportsyou or contact lindseysmith@gpvb.org
