Hi Patrick,

Any product added to a Wilson, DeMarini, Louisville Slugger or EvoShield helmet that is not made by us will absolutely void the NOCSAE certification of that helmet. Only products that are made by us and intended to be added to those helmets (as specified on product packaging) can uphold that certification. We cannot be responsible for all third party products on the market and certainly ones that propose drilling holes into our products.

Thank you and I hope this clears up any confusion. If you have any questions please let me know.
