

### 3 Divided Sections

#### Set Up

Need 2 carts – 4 people per cart. Use the wood ramps to pull the carts on to the ice.

Grab enough nets to put in place on the ice per section before setting up boards. 2-person lift per net is best. Extra mite nets can be found in the Leadership rink. Extra regulation nets can be found in any rink.

Dividers are to be set up directly next to the bench door closest to the penalty box. Should be over the "Furniture Mart". Lift each board off the cart (2-person lift).

Place the tightening straps in each of the V's but do not tighten yet.

Once all boards are set up, use the tightening straps to remove any gaps between boards. Do NOT do it too tight that the boards start to buckle. Make sure door of each set can open and close.

#### Take Down

Grab 2 empty carts – 4 people per cart.

Loosen the ratchet straps in each V sections next to the rink boards.

2-person lift per board to add to cart. Straight pieces are placed on bottom of cart. Curved pieces and ratchet straps are to be placed on the top.

Use the wooden ramps to pull the carts off the ice. Place in the Zamboni area.

Move nets to storage – Mite nets are either in the hallway between rinks (max of 4) against the wall or in Leadership rink under the stairs. Regulation nets are by Zamboni doors in any of the rinks.
