

How to Set your Roster to Private

You are able to update the status of the roster while in edit mode. Head to the **ADMIN** area and select **TOOL SETTINGS** from the choices.

Roster status includes:

- **Inherit** - Depending on the status of your page, the roster will appear on the Team page. If the page is private, the roster will not appear.
 - **Disabled** - Roster will NOT show on the Team Page.
 - **Private** - Roster will only show to those that are rostered or who have permissions to access that Team Page.
1. Under *Status*, choose either **Inherit**, **Disabled**, or **Private**.
 2. In the top-left corner, click **Save Changes**.
