

Ice Center Reopening Protocols

The main entrance will be split into two sides with a clear protective barrier. The doors will be updated daily to show which group will be entering which door.

It is asked that you come nearly dressed, if not fully, as players will have 15 minutes prior to your start time to get ready. **Masks are required at all times.** Temperature checks may or may not be taken.

Online Covid-19 waiver is required for everyone entering the facility. This can be made available from your Organization. Each group should have a "leader" who will have to provide an updated attendance list daily for contact tracing purposes.

Once you enter the building, you will be instructed to follow towards your designated changing area which will have chairs to sit in. You will enter onto the ice by a designated door. Once your scheduled time is up, you will then have 15 minutes to exit the building while the zamboni is on the ice.

At this time the second group (if scheduled) will be entering through the left hand doors and proceeding to their designated changing area, following the same protocols. This will allow Ice Center staff to begin sanitizing, alternating areas as the day goes on.

Locker rooms will be locked and unavailable for now, as will showers.

The water fountain will also be unavailable. We advise you to bring your own water and make sure you leave with it.

We will only have one single gender neutral bathroom available.

As for now, no spectators are allowed. Only essential rink/organization people will be allowed. The only exception is if any children need help from parents to tie skates, etc - the parents can walk in quickly, help their child, but are then asked to leave.

Snackbar will remain closed.

For the month of September we are maintaining the 30 minute gap between skates to allow all of us to get used to the protocols, and allow our staff to become efficient at the cleaning procedure. By October we plan to be running at full capacity with the traditional 15 minute down time for the zamboni.
