**Uploading Photo's To Your Team Page**

From Your Phone:

The Pinnacle Volleyball system gives each member of the team (parents included) the ability to upload photos to their specific team page. If you do not already have it, download the SportsEngine app onto your phone. Once installed, log in using your SportsEngine credentials. This is the same ID & Password you had used to register your daughter's Pinnacle Acceptance or Tryout Registration. Typically, your email address is your ID. This is your master account for all things Pinnacle/SportsEngine. Once you are logged in, you should already be associated with your team. (Example - 14 Kim) You will get a screen with icons as seen below:

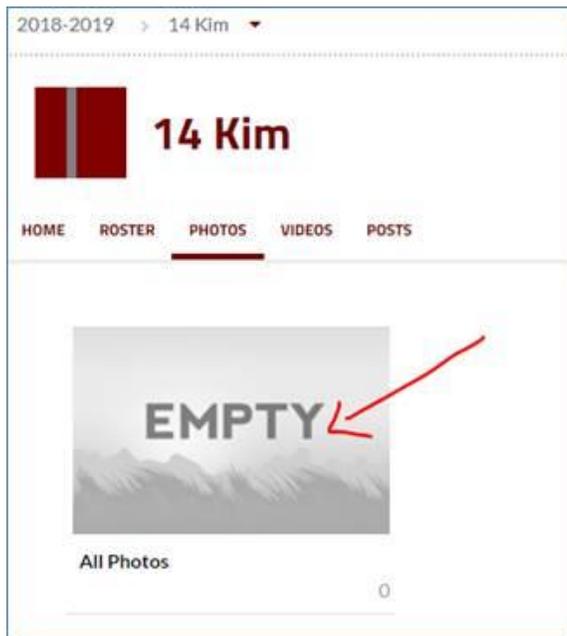

Choose **Photos**. Another screen displays where you can choose "All Photos". Select "**All Photos**" and the next screen will appear:
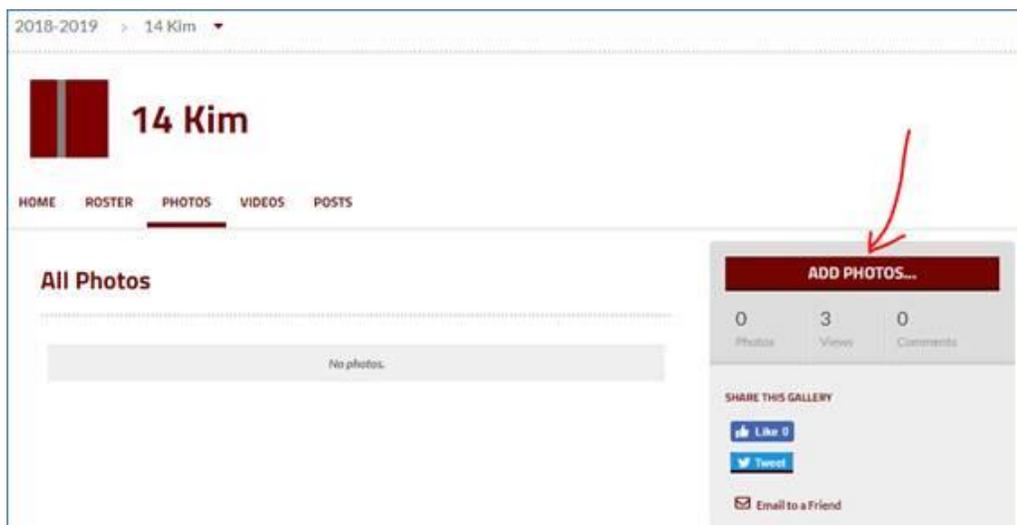

Choose the camera icon. You can then take a real-time photo, or ***Choose from Library***. The latter will access your phone's photo library. ***Please remember, everyone on the team can see these photos once you upload them***. You also have an option to upload short video clips to the same team page.

From the Pinnacle Volleyball Academy Website:

Go to *www.pinnaclevb.com* and log into the site with your SportsEngine credentials. Select your team page (Example – 14 Kim) Select the tab for *PHOTOS*. You will be brought to the following screen:

Click anywhere in the area where it says *EMPTY* and you come to the next screen:

Just click *ADD PHOTOS* and follow the directions on the following screen:

Choose *Select files...* You are asked to choose your photo file location and pick the ones you like to upload.

Again, your team as well as the general public can view these files.

Have fun snapping photos and sharing with your team!
