

## 710 FORMER

710/60 Mechanical Former:  
15 – 60 strokes/min,  
250 lb. hopper

Nutec's smallest Food Former, this little giant of a machine features a unique design that eliminates constant adjusting during change-overs.

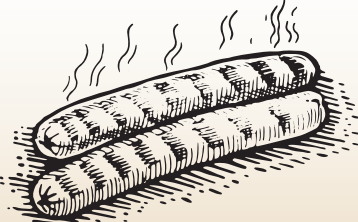

- Produces up to 3,600 patties per hour
- 6" useable mold width
- 5 HP heavy duty drive
- Up to 2,250 lbs/hr
- Multiple fill options available
- Ultimate patty forming system
- Adjustable auger feed system
- Paper interleaving system with stack & count option

## 720 FORMER

720 Hydraulic Food Former:  
15 – 65 strokes/min, 300 lb. hopper

Derived from the proven designs of larger Nutec models, the 720 is one of the most versatile and reliable forming machines for small to medium processors as well as R & D labs.

- Produces up to 7,800 patties per hour
- All hydraulic operation
- 9.5" useable mold plate width

- 15 horsepower power system
- Up to 2,600 lbs/hr
- Optional Ultimate or Roto-Flow Fill Systems
- Mold plate thickness up to 1 1/8"
- Paper interleaving with stack & count option

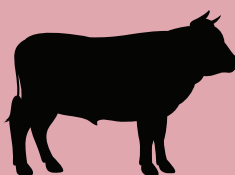

# MENU

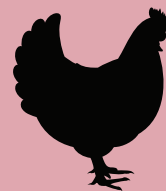

## Food Forming Systems

Uniformity from patty to patty, link to link, nugget to nugget. Nutec's technology assures minimal product damage and accurate, consistent portions, hour after hour, whether you run beef, chicken, pork, seafood, alternative proteins or veggies. Whatever your production requirements, Nutec can meet the need.
