METAL 2 PRO

**BBCOR
CERTIFIED .50**

More power. More hits.

The Metal 2 Pro BBCOR aluminum alloy baseball bat is made with the highest quality materials we've ever used in a baseball bat.

Even More BBCOR.

We thought we maxed out the BBCOR rating of our first generation of bats. Well, we outdid ourselves this time. BBCOR bats are limited by the rules to a rating of .50 or lower. All Metal 2 Pro bats have a rating of between .496 and .499—it doesn't get much closer than that.

More barrel, more contact.

The Metal 2 Pro BBCOR features an extended barrel and upgraded taper compared to the first generation Metal Pro. The longer barrel gives the Metal 2 more surface area to make contact with the baseball, and a better chance for you to send one to Pluto.

The best materials.

The Metal 2 Pro uses better alloy than any baseball bat we've ever made. It delivers long-lasting, consistent power and performance swing after swing. You get a more durable bat that sends the ball farther, all backed by our simple and easy 1 year durability guarantee.

Stronger than ever.

By taking what we learned from our first generation and overhauling our design, we made Metal 2 Pro the most durable BBCOR bat we have. Featuring variable wall thickness at the sweet spot, a modified taper, and an updated wall design.

New and improved grip.

All the power in the world doesn't mean much if you can't actually use it. Just like a bat with all the pop in the world doesn't mean much if it hurts to make contact. We completely redesigned our grip — including the taper and grip wrap — to help give you a comfortable hold on your bat that won't hurt.

Durability, guaranteed.

If your bat breaks within its warranty period, we will replace it for free.

METAL PRO

Power and performance.

The Metal Pro BBCOR aluminum alloy baseball bat combines premium materials and superior manufacturing to deliver a powerful bat with consistent performance.

BBCOR RATING (.500)

Max Power. Max BBCOR.

A BBCOR rating of over .499 gets a close to the legal limit .500 as possible. The Metal Pro beats top of the line bats in BBCOR rating and power output at a fraction of the price.

Balanced Speed.

The Metal Pro features a balanced weight distribution that's slightly end-loaded, giving batters faster hands and a more powerful swing.

Consistent Power.

The Metal Pro has a BBCOR rating that stays as high as possible throughout the barrel giving batters a wider and more consistent sweet spot.

METAL PRO

Youth Big Barrel & Senior League.

The StringKing Metal Pro USSSA aluminum alloy baseball bat combines premium materials and superior manufacturing. It delivers a powerful youth league baseball bat with consistent, long-lasting performance. Built to hold up over time.
