## NEW RESTRICTIONS FOR SOFTBALL ACTIVITIES

With the announcement today from Dr. Henry on new restrictions in place, we are announcing the following changes to sanctioned softball activities effective Sunday, November 8<sup>th</sup>, 2020. These changes will remain in effect until further notice.

For all clubs and members of Softball BC registered in Districts 4, 5, 6, 7, 8, 14 and 15, all sanctioning for softball activities is being moved back to Inning One protocols. This restriction on sanctioned softball activities will be in effect for those districts only, which comprise the Fraser Health and Vancouver Coastal Health regions.

All other districts in BC can continue to operate, at this time, under your current sanction permissions for softball activities.

Inning One protocols include

- Physical distancing should be followed at all times during softball activities
- Minimize shared use of equipment, and when equipment must be shared, frequent sanitizing is required
- Practise and skill development only, no games or scrimmages

For your reference, I have attached both the outdoor Inning One protocols and the Indoor Facility protocols. Please ensure you are following these and that your club's safety plans reflect these requirements.

As always, should you have any questions, please don't hesitate to contact me via email at [rbenson@softball.bc.ca](mailto:rbenson@softball.bc.ca)

Regards
