

Scenario 1: Team Member (TM = player or coach) tests (+)

- Guidelines to return
- A minimum of 10 days since the onset of symptoms;
 - There is no fever for at least 24 hours without medication;
 - Symptom-free for 48 hours
 - The player has met the current guidelines set forth by the Wyoming Department of Health for returning to normal activities, and is in compliance with any orders from the Department of Health.

Team activities are suspended.
TM's may return to the ice:

1. After day 10 symptom-free without testing
2. After day 7 after receiving a negative test result (test must occur on day 5 or later)

*** Team activities are suspended starting from any team activity that occurred within 48 hours prior to onset of symptoms**

Scenario 2: Team Member (TM = player or coach) displays covid-like symptoms or is concerned about potential (+)

Guidelines to return

- A minimum of 10 days since the onset of symptoms;
- There is no fever for at least 24 hours without medication;
- Other symptoms of COVID-19 are improving
- The player has met the current guidelines set forth by the Wyoming Department of Health for returning to normal activities, and is in compliance with any orders from the Department of Health.

Team activities are suspended. TM's may return to the ice either:

1. After day 10 symptom-free without testing
2. After day 7 after receiving a negative test result (test must occur on day 5 or later)

** Team activities are suspended starting from any team activity that occurred within 48 hours prior to onset of symptoms*

Did the TM practice with the team within 48 hours of onset of symptoms?

Team activities continue

TM continues to stay home following guidelines to return

LAHC informs team of (+) test, possible exposure date(s)

YES

Did the TM test (+)?

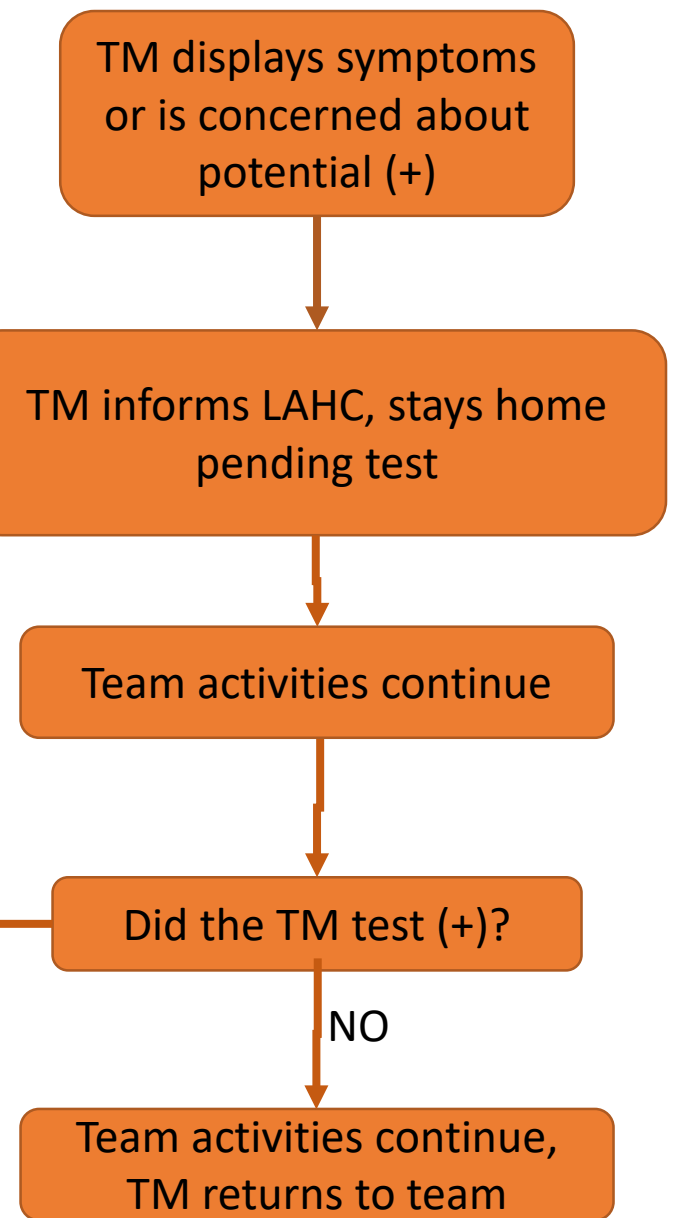

NO

Team activities continue, TM returns to team

TM displays symptoms or is concerned about potential (+)

TM informs LAHC, stays home pending test

Team activities continue

Scenario 3: Multiple TM's display covid-like symptoms, indicating potential team outbreak

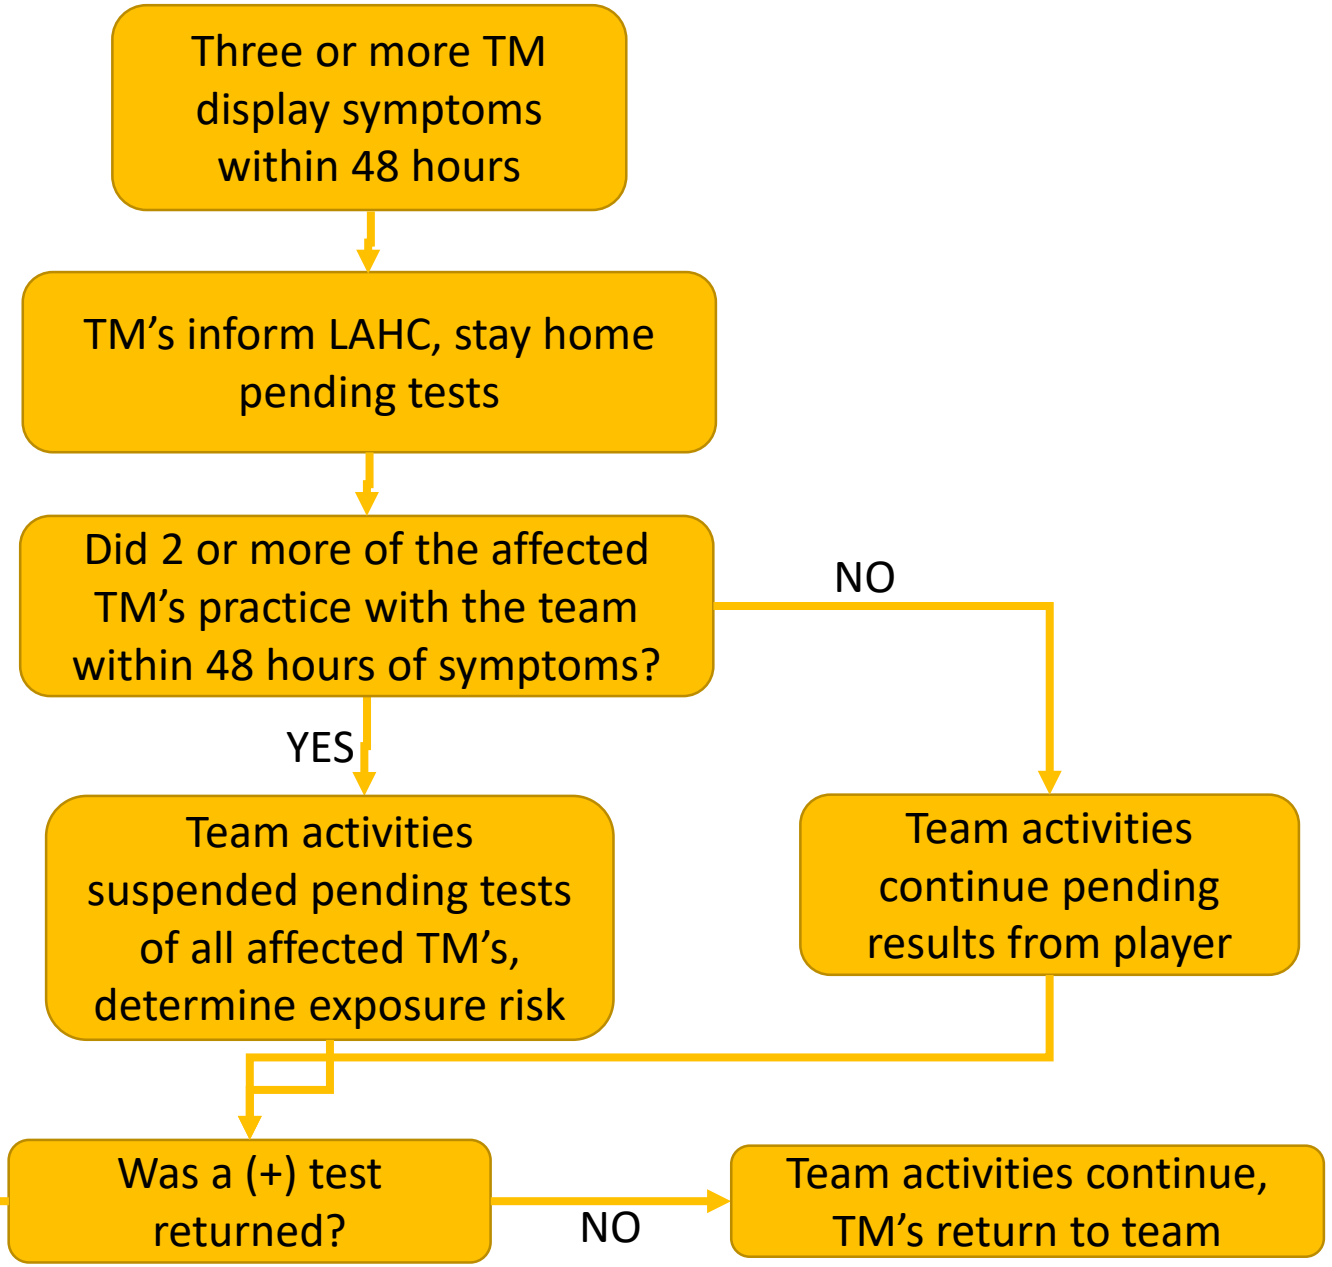

- Guidelines to return
- A minimum of 10 days since the onset of symptoms;
 - There is no fever for at least 24 hours without medication;
 - Other symptoms of COVID-19 are improving
 - The player has met the current guidelines set forth by the Wyoming Department of Health for returning to normal activities, and is in compliance with any orders from the Department of Health.

TM's continue to stay home following guidelines to return

Team activities are suspended. TM's may return to the ice either:

1. After day 10 symptom-free without testing
2. After day 7 after receiving a negative test result (test must occur on day 5 or later)

** Team activities are suspended starting from any team activity that occurred within 48 hours prior to onset of symptoms*

Scenario 4: Team Member (TM = player or coach) comes into contact with known (+) case

Close Contact 10/28/20 from CDC: "Someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated."*

- Guidelines to return
- A minimum of 10 days since the onset of symptoms;
 - There is no fever for at least 24 hours without medication;
 - Other symptoms of COVID-19 are improving
 - The player has met the current guidelines set forth by the Wyoming Department of Health for returning to normal activities, and is in compliance with any orders from the Department of Health.

** Team activities are suspended starting from any team activity that occurred within 48 hours prior to onset of symptoms*

Team activities are suspended. TM's may return to the ice either:

1. After day 10 symptom-free without testing
2. After day 7 after receiving a negative test result (test must occur on day 5 or later)

TM comes into close contact with (+) covid case

TM informs LAHC, stays home post-exposure

Team activities continue

Did the TM test (+)?

Team activities continue; TM may return to the ice either:

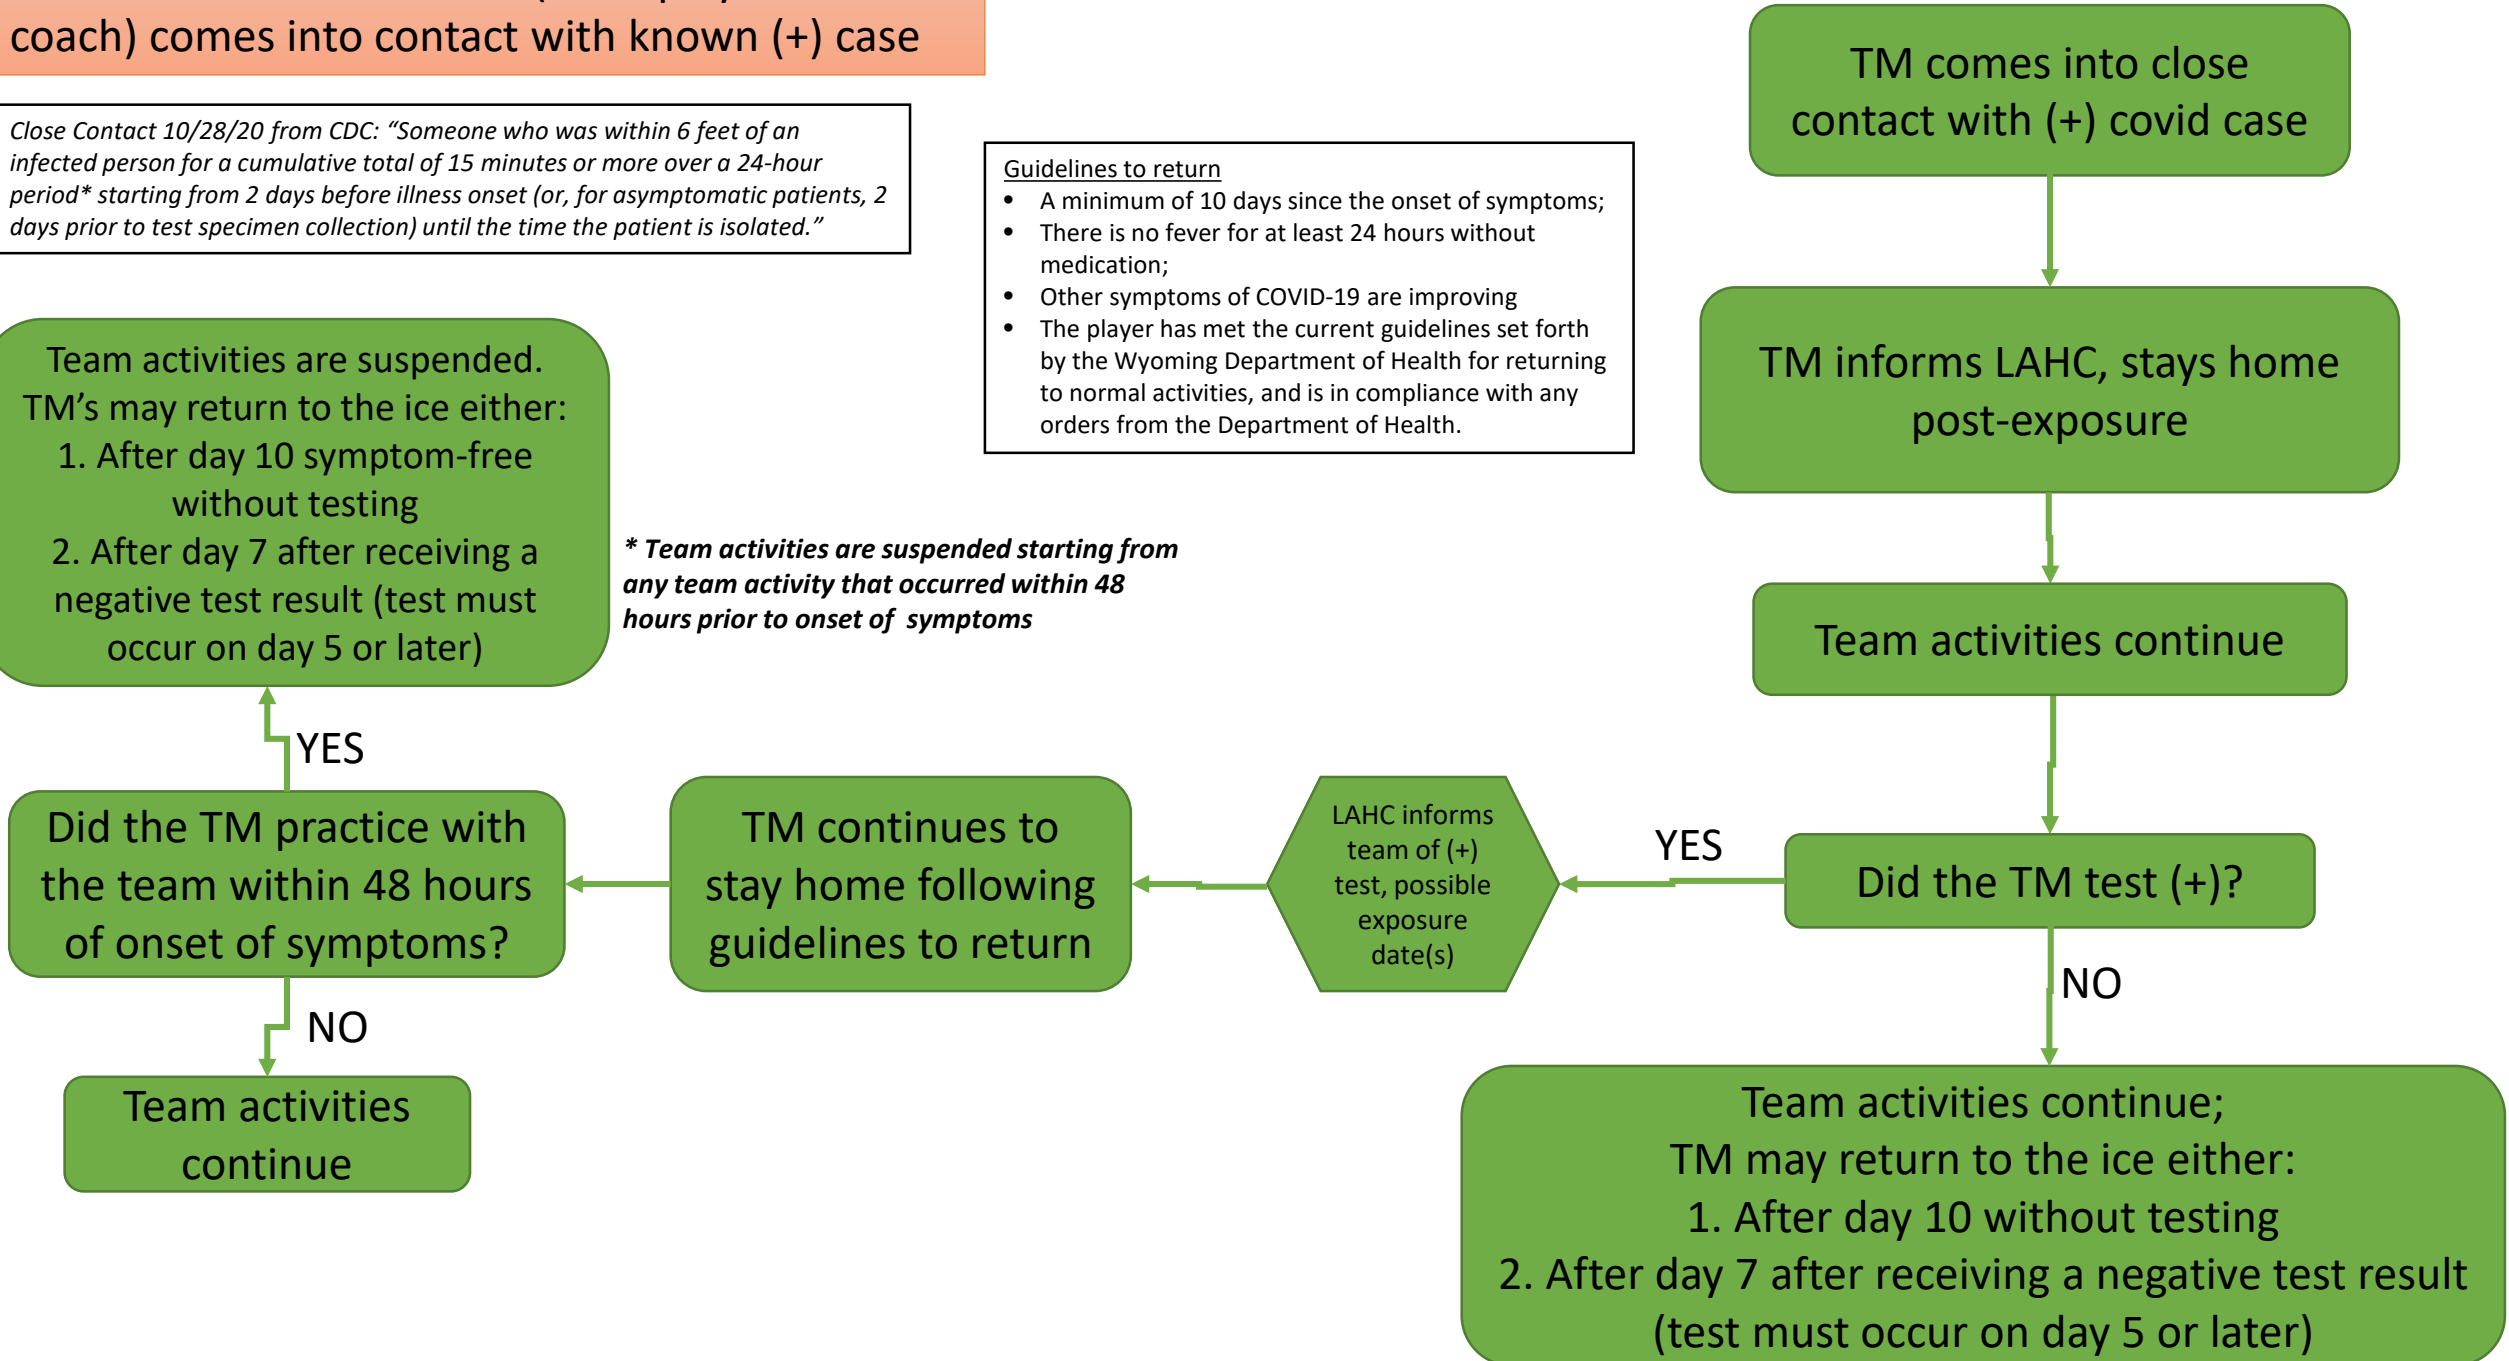

1. After day 10 without testing
2. After day 7 after receiving a negative test result (test must occur on day 5 or later)

TM continues to stay home following guidelines to return

LAHC informs team of (+) test, possible exposure date(s)

Did the TM practice with the team within 48 hours of onset of symptoms?

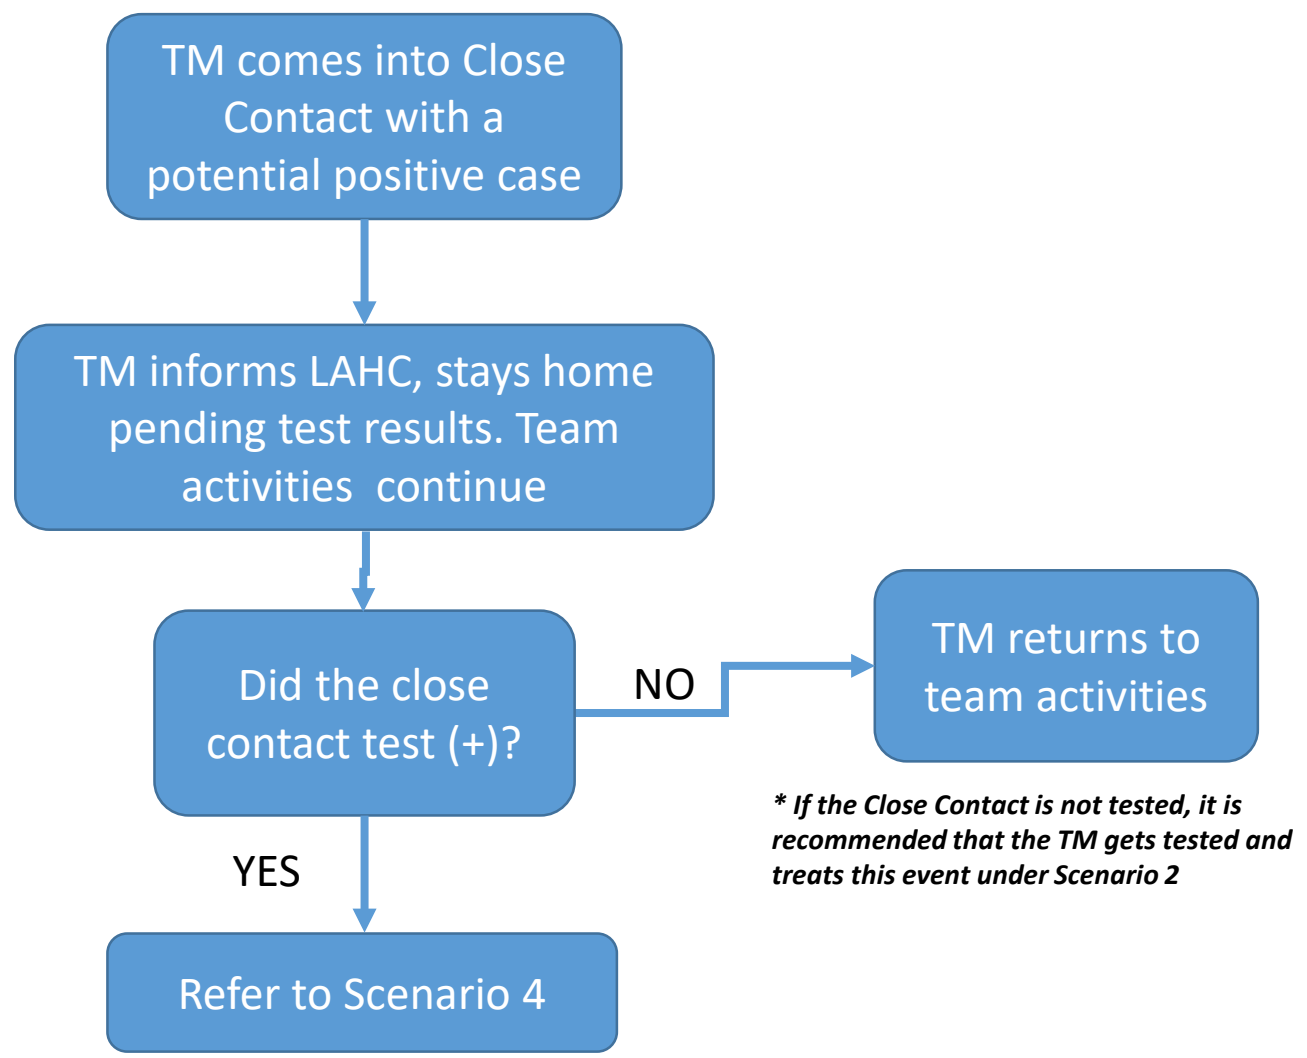

Team activities continue

Scenario 5: Team Member (TM = player or coach) comes into contact with a potential (+) case

Close Contact 10/28/20 from CDC: "Someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated."*

- Guidelines to return
- A minimum of 10 days since the onset of symptoms;
 - There is no fever for at least 24 hours without medication;
 - Other symptoms of COVID-19 are improving
 - The player has met the current guidelines set forth by the Wyoming Department of Health for returning to normal activities, and is in compliance with any orders from the Department of Health.

** If the Close Contact is not tested, it is recommended that the TM gets tested and treats this event under Scenario 2*
